	<input checked="" type="checkbox"/> Full-time <input type="checkbox"/> Contractor <input type="checkbox"/> Part-time <input type="checkbox"/> Intern	<input type="checkbox"/> Exempt <input type="checkbox"/> Nonexempt

POSITION SUMMARY

In this role you will assist in building functional systems that improve the customer experience, we're looking for a DevOps engineer who can be responsible for deploying product updates, identifying production issues, and implementing integrations that meet our customers' needs. The ideal candidate will have a solid background in software engineering and be familiar with C++, Python, and Azure, and will work with developers and engineers to ensure that software development follows established processes and works as intended. The DevOps engineer will also help plan projects and be involved in project management decisions.

RESPONSIBILITIES

1. Deploy updates and fixes, and provide Level 2 technical support
2. Build tools to reduce occurrence of errors and improve customer experience
3. Application performance monitoring of products deployed in the field
4. Perform root cause analysis of deployment errors and resolve technical issues
5. Design procedures for system troubleshooting and maintenance
6. Selecting, provisioning, and maintaining CI/CD tooling, or writing and maintaining build/deploy scripts.
7. Deploying and maintaining servers and networking resources required to host cloud services.
8. Develop scripts to automate visualization

QUALIFICATIONS

REQUIRED

- Bachelor of science degree (or equivalent) in computer science, engineering, or relevant field
- Experience as a DevOps engineer or in a similar software engineering role, such as provisioning and managing servers, deploying databases, security monitoring, and system patching
- Experience with cloud development using AWS or Microsoft Azure
- Proficiency with Git and GitHub workflows
- Good knowledge of programming languages, such as C++, Python, Bash, and more
- Working knowledge of databases and SQL
- Experience with Linux
- Problem-solving attitude
- Collaborative team spirit

DESIRED

- Working knowledge of IoT devices, cellular communication, and VPN's.
- Experience in customer experience
- Experience in developing/engineering automation applications in the Oil & Gas industry
